EDUCATION

Master of Computer Science

Artificial Intelligence 2026-2028
Monash University
Melbourne, VIC, Australia

MS, Computational Chemistry

(Quantum Computing) 2024-2026
University of California, Merced
Merced, CA, USA

CERTIFICATES

Codecademy
Create REST APIs with Spring and Java Skill Path, March 2026

Intro to Java, March 2026

Analyze Data with SQL Skill Path, February 2026

Data Engineering (Expected), April 2026

AWS Certified Data Engineer - Associate (DEA-C01) (Expected), June 2026

PROFILE

Highly skilled builder transitioning from Quantum Computing research to Machine-Learning Systems, and Full-Stack Software Engineering. I focus on building production-minded backend, data, and ML systems, starting from reliable pipelines and analytics APIs to deployment-ready inference services. I care about correctness and reliability (tests, data contracts, observability), but I'm equally focused on impact by shipping useful features, improving decision quality, and building systems that scale.

Interested in my work? Check out my portfolio.

EXPERIENCE

Full-Stack MLOps & Data Engineer
Independent Projects, Jan 2026-present

- Building end-to-end intelligent systems at the intersection of full-stack development, data engineering, and machine learning
- Built production-style architectures using Python, FastAPI, SpringAPI, Docker, AWS services, Airflow-style orchestration, and React-based visualization

Graduate Teaching Assistant
University of California, 2024-2026

- Led instruction for 30+ students in Calculus (Dept. of Applied Math) and General Chemistry (Dept. of Chemistry)
- Mentored students one-to-one and as a group during discussion sections
- Designed grading rubrics emphasizing analytical problem-solving and concept retention

SKILLS

Proficient in Python, SQL, and Java
Working knowledge of JavaScript
Experience with machine learning (scikit-learn, PyTorch, TensorFlow)
Experience with ETL pipelines, PostgreSQL, and Airflow
Experience building REST APIs
Strong problem-solving and quantitative skills
